Available in eight powder coated, matt colours, with the option of choosing a different colour for the interior to help you find the look that is right for your property.

A further three anodised finishes are available for the ultimate durable and stylish finish.

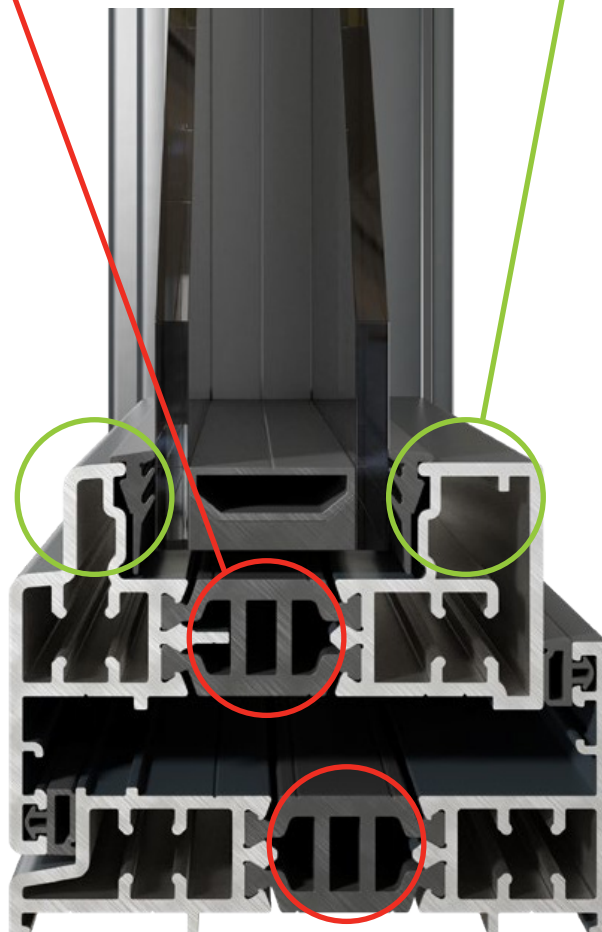

Thermlock®

Thermlock® technology helps keep you and your home snug and warm.

Cold, crisp lines on the outside hide away our innovative Thermavac® multi-chamber thermal design, helping keep you and your property well insulated against the worst of the UK weather. This closed-cell, insulating chamber acts as a thermal break and works in conjunction with our high performance double glazing to create class leading thermal performance, far superior to traditional polyamide thermal breaks. Cills also feature this same technology coupled with innovative in-built weather sealing that keep draughts and rain safely outside.

Cut-through of Flush-Fit Stepped Sash

Beadless Security

The innovative construction of the Classic window system eliminates the need for separate glazing beads – often an area of weakness in traditional window design. Patented corner jointing method securely locks the glass within a completely sealed unit. This coupled with our high security multipoint locking and unique hinge protectors creates unparalleled levels of security. PAS24:2016 enhanced security accreditation. For added security choose our laminate glass upgrade – for Secured by Design accreditation – the official UK Police initiative ‘designing out crime’ through physical security.
